

**“You can buy a paver
anywhere. It’s the
service that matters.”**

Butch Sebers

“We looked at all contenders and decided on the Roadtec RP-195 rubber-track paver in ‘07 and bought a second one in ‘08. Roadtec performance is great for the variety of work we do from toll ways, to airports to village overlays. But what really matters to us is service and parts availability. Roadtec takes care of us. You can buy a paver anywhere. It’s the service that matters. And we get it from Roadtec.”
